Pars Ceram Company, as the first and largest sanitary ware manufacturer in Iran, was established in 1967 by Italian engineers and has been publicly listed in Tehran Stock Exchange since 50 years ago.

Bearing in mind our slogan "Quality is the Secret of Longevity" we have strived constantly for incorporating creativity, art, cutting-edge technologies and techniques within our R&D and quality control departments to produce high-end products namely Toilet bowls, Washbasin, Pedestal, Bidet, Urinal, Sink, Bathtub, Wall Hung, Squat toilets. This, paired with the significant production capacity of 14,200 tons per annum, have enabled Pars Ceram to be at the top of the chart within the Iranian sanitary industry, meeting both domestic and international market demands by introducing high-end goods in various types and designs.

The benefits of high-quality assurance policy go far beyond acquiring the largest domestic market share and excellent reputation. This company has been elected by The Islamic Republic of Iran Ministry of Industry, Mining and Trade as the pioneer exporting company for several consecutive years.

All in all, this is not the End of the road, but the continuation of path we opted for at the beginning.
